

AKHIL RAJAN

Data Analyst & Team Lead

0547423414 | akhilrajan201046@gmail.com

PROFILE

Results-driven Data Analyst and Team Lead with strong hands-on expertise in SQL, Python, Power BI, and Zoho Analytics. Currently leading a team of analysts while architecting end-to-end data workflows — from SOP compliance reporting and live dialer dashboards to KPI pipelines and automation. Background in Mathematics with proven ability to design complex multi-join SQL queries, build real-time reporting systems, and translate business requirements into actionable insights. Adept at stakeholder management, cross-team collaboration, and driving data-driven decision-making.

WORK EXPERIENCE

Connectcare Solutions Feb 2025 – Present

DATA ANALYST & TEAM LEAD

- Lead and coordinate a team of analysts, managing workload distribution, reporting cadences, and ensuring data accuracy across multiple business functions.
- Architected a comprehensive SOP Compliance Reporting system in Zoho Analytics using advanced multi-join SQL — tracking call frequency adherence, first-call-within-15-minutes SLA, scheduled/overdue call detection, and per-agent SOP status (On Track / At Risk / Breaching) with full status and owner history audit trails.
- Designed and maintained 10+ interactive dashboards in Zoho Analytics supporting operations, customer support, and management reporting across departments.
- Built a live dialer reporting system integrating StringeeX API with a Django (Python) backend and PostgreSQL, polling call data every 4 minutes across multiple portals with token-protected web dashboard — replacing manual hourly reporting entirely.
- Automated KPI-based incentive calculation pipelines using SQL integrated with Zoho Analytics, eliminating manual calculations and ensuring consistent and timely incentive processing.
- Developed Selenium-based web scraping applications to extract data from multiple internal and external web panels; integrated into a Tkinter desktop application for non-technical users.
- Implemented an incremental data upload mechanism using backup files and webhooks, reducing redundant data uploads by ~70%.
- Analyzed customer trade activity reports to identify active and inactive customers, supporting pullback strategies and re-engagement initiatives.
- Developed dashboards tracking pending support tickets, ticket aging, issue categories, and resolution timelines — improving SLA monitoring across the Chat Support Team.
- Designed end-to-end data workflows covering extraction, transformation, validation, and reporting to improve data reliability.

Royal Furniture 2022 – 2024

MIS ANALYST

- Prepared and maintained regular MIS reports in Microsoft Excel tracking sales, inventory movement, and operational performance.
- Designed Excel templates using advanced formulas, pivot tables, and charts to standardize recurring reports and reduce manual errors.
- Consolidated data from multiple manual sources (invoices, stock registers, sales logs) into structured reporting files.
- Analyzed sales trends and product movement to support demand planning and stock replenishment decisions.
- Created periodic management summary reports highlighting monthly sales, category-wise performance, and slow-moving items.

Smart School 2019 – 2022

PROOFREADER / CONTENT WRITER

- Created SEO-optimized content aligned with client guidelines and keyword strategies.
- Proofread and edited academic and professional documents for clarity, structure, and accuracy.
- Collaborated with internal teams to deliver content within tight deadlines.

KEY PROJECTS

SOP Compliance Reporting System | *Zoho Analytics · SQL · Multi-join · Window Logic*

- Designed a dual-report SQL system (lead-level detail + agent summary) to enforce call SOP compliance across the sales team.
- Built logic to calculate required calls dynamically based on lead status, working-day-adjusted elapsed time (excluding Sundays), and a custom calendar table.
- Implemented three SOP checks per lead: call count compliance, first-call-within-15-minutes from assignment, and scheduled/overdue call detection with timestamps and responsible agent.
- Agent summary report computes SOP Met %, First Call SLA %, Overdue Count, and auto-labels each agent as On Track / At Risk / Breaching — filtered to current month and excluding admin accounts.
- Used 6 sub-queries with GROUP_CONCAT, TIMESTAMPDIFF, IFNULL, DATEADD, and conditional aggregation for audit-trail history of statuses and ownership changes.

Live Dialer Reporting Dashboard (StringeeX + Django) | *Python · Django · PostgreSQL · StringeeX API · Ngrok*

- Built a full-stack web application integrating the StringeeX telephony API with a Django backend to capture, store, and display live call data (CDR) across multiple dialer portals.
- Implemented a daemon polling mechanism that fetches CDR records every 4 minutes from multiple StringeeX portals, de-duplicates entries, and persists them into a PostgreSQL database.
- Designed a token-protected web dashboard (session-based auth) accessible via a secure shareable URL — providing managers with real-time call activity, agent performance, and connection metrics.
- Replaced a fully manual hourly reporting process, delivering continuous live visibility into dialer activity with zero manual intervention.
- Stack: Django, PostgreSQL, StringeeX REST API, Python (requests, schedule), deployed with Ngrok for external access during rollout.

SKILLS

Analytics & BI: Zoho Analytics (Advanced SQL, Custom Queries, Dashboards), Power BI, Microsoft Excel (Pivot Tables, Advanced Formulas)

SQL: Complex multi-join queries, CTEs, Subqueries, Window Functions, Conditional Aggregation, GROUP_CONCAT, TIMESTAMPDIFF, DATEADD

Python: Pandas, NumPy, Selenium, Tkinter, Requests, Django, Scheduling/Daemon scripts

Data Engineering: Incremental Data Loading, Webhook Integration, API Integration, Reporting Automation, SQL Pipelines

Web & Apps: Django (Python), PostgreSQL, Selenium Automation, Tkinter Desktop Apps, REST API integration

Reporting: KPI Definition & Tracking, SOP/SLA Monitoring, MIS & Operational Reporting, Ad-hoc Analysis, Trend Analysis

Soft Skills: Team Leadership, Stakeholder Communication, Cross-team Collaboration, Process Improvement, Problem Solving

EDUCATION

BSc Mathematics – Mahatma Gandhi University (2010 – 2014)

LANGUAGES

English | Hindi | Malayalam
